SUMMARY

Software Engineer and 2026 Computer Science graduate with internship experience building backend services, REST APIs, and real-time communication features for a B2B ERP platform. Hands-on experience with Python, Java, Django REST Framework, PostgreSQL, Redis, React, and FastAPI. Built full-stack and AI-enabled applications involving authentication, API integrations, document retrieval, and WebSockets. Strong foundation in data structures and algorithms, with 250+ LeetCode problems solved.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, TypeScript
Backend & APIs: Django, Django REST Framework, FastAPI, Node.js, REST APIs, WebSockets
Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, ChromaDB
Frontend: React.js, HTML, CSS
Tools & Concepts: Git, GitHub, Docker, Postman, OOP, API Design, Authentication & Authorization, SDLC, RAG

EXPERIENCE

MyBizzERP *Apr 2026 – Oct 2026*
Software Development Engineer Intern

- Developed backend modules and REST APIs with Django REST Framework for a B2B ERP platform supporting business workflow automation.
- Built a real-time chat microservice using WebSockets to support low-latency communication workflows.
- Designed authentication, messaging, and business APIs following RESTful principles.
- Worked on PostgreSQL schema design and query workflows for transactional data management.
- Collaborated on a microservice-based backend architecture and API integration workflows.

PROJECTS

AI Flow Studio – Document Query Platform

- Built a RAG-based document query platform with semantic search and contextual retrieval.
- Developed FastAPI services for document ingestion, chunking, vector indexing, and retrieval; integrated PostgreSQL and ChromaDB for metadata and vector search.

Tech: FastAPI, React, PostgreSQL, ChromaDB, Docker

Link3D – Secure URL Management Platform

- Developed a URL management platform with authenticated access, expiration handling, and analytics tracking.
- Designed REST APIs for link creation, redirection, and lifecycle management; implemented validation, authorization, and user-scoped access.

Tech: React, TypeScript, Supabase, REST APIs

MyJarvis – Voice-Enabled AI Assistant

- Built a web-based voice assistant integrating microphone input, Gemini AI processing, speech-to-text, and text-to-speech.
- Developed a responsive interface with REST APIs, JWT authentication, guest access, and user-specific conversation history.

Tech: React, TypeScript, Node.js, MongoDB, Google Gemini

EDUCATION

Anurag University, Hyderabad *2022 – 2026*
B.Tech, Computer Science CGPA: 8.4/10

Sri Chaitanya Junior College *2022*
Intermediate 96%

Sri Chaitanya High School *2020*
SSC 10/10

ACHIEVEMENTS

- Solved 250+ problems on LeetCode.
- HackerRank badges: Python (5), Java (4), Problem Solving (3).
